OCR Connector
3.0

Document Converter with Powerful OCR

Take the pain out of your document inflow! OCR Connector is created specifically to address the inefficient processing of information trapped on paper and thus enhances your productivity. An Optical Character Recognition (OCR) solution embedded in Konica Minolta's multi-functional products, converts scanned paper documents into editable and searchable electronics files, including MS Word, Excel, PowerPoint, Searchable PDF (S-PDF) and Plain Text. The result, not limited to only in one format but in multiple formats through one scan, can be sent directly to SMB (shared folders), email addresses and FTP.

Thanks to its multi-language, OCR Connector can recognise over 180 languages, such as English, Simplified Chinese and Traditional Chinese. It also preserves the layout and format of the original documents.

OCR Connector is the powerful link to convert any scanned documents into editable format easily and directly from your Konica Minolta Multi-function Printers (MFP's). There is no need to install any software on your PC or Notebook as all conversion is done centrally.

▶ Features

Simple and consistent
user-friendly interface

Instant document sharing
via Email, Shared Folders and Sharepoint

5 compatible output formats - MS Word, Excel, PowerPoint, Searchable PDF (S-PDF) and Plain Text

Upload document
PDF, JPEG or TIFF files from your desktop for convertion

"Enhance your **workflow efficiency** *with the powerful* **Document Converter"**

OCR Connector version 3.0
Document Converter with Powerful OCR
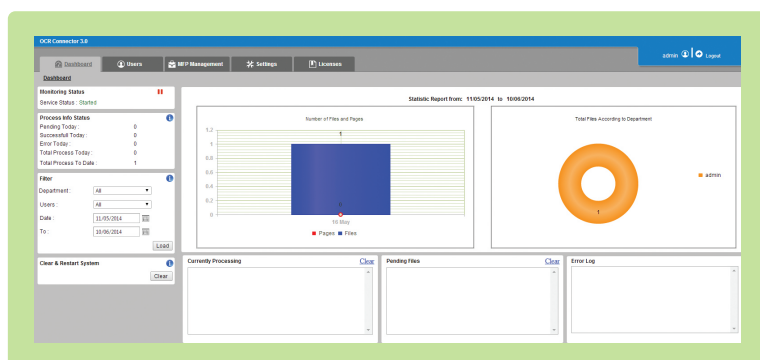

The solutions of

➔ Benefits

- One-stop conversion of all your documents directly from the MFP

- No need to install any software on the destination PCs. All selections are done from the MFP itself before scanning

Fig 1: Select OCR options directly from MFP panel

- You have multiple choices of how the files will be delivered to your PC via either Email, FTP or SMB

- No limit on performing OCR from a single MFP. You can also have additional MFPs connected to the OCR server to extend the service to other users/departments.

- Easily check your user account, usage and set preferences via a web interface from any web browser.

- Never worry again about software licensing issues as you can have as many users performing OCR directly from the MFP.

- Easily manage all the setting from one easy control panel.

- Create multiple output formats from the same scanned file. You will receive the documents you scanned in the format you need (eg MS Word, Excel, PowerPoint, TEXT File and PDF) at your PC.

- Supports multiple languages (up to 186 languages).

- Easily add-on additional MFP's as your business need grows.

➔ Specifications

Item	Hardware Requirements
Processor	Intel Core 2 Duo processor and above
Memoray (RAM)	2GB RAM or higher
Network Adapter	10/100 Mbps MHz
Free disk space	500MB
USB Port	2.0
Operating System	■ Windows XP Pro (SP3)
	■ Windows Vista Business/Ultimate
	■ Windows 7 Pro or higher
Windows Components	■ IIS6 and above
	■ Net FrameWork 3.5
Compatible Konica Minolta MFPs	Konica Minolta MFPs with OpenApi-Compliant with Hard Disk
